

K•G spot  
sofa design by Litvinenko Yevhenii

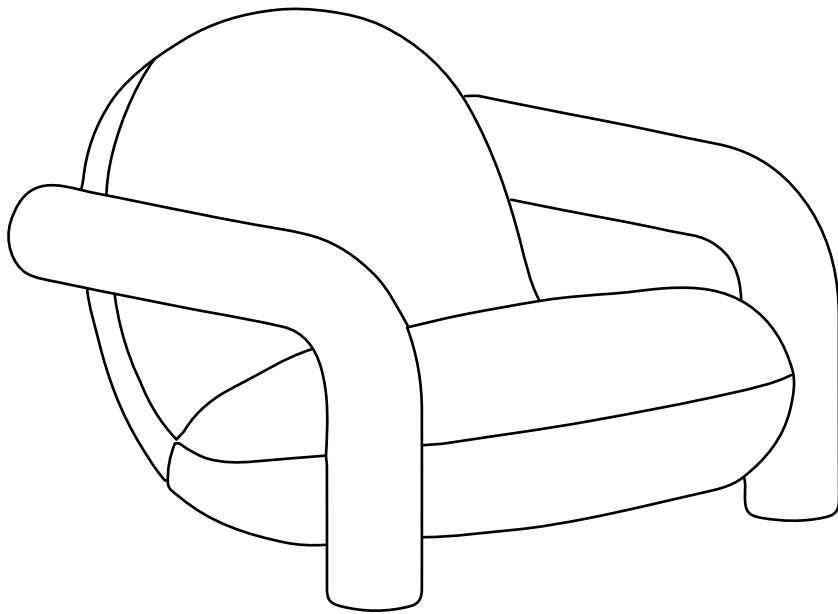

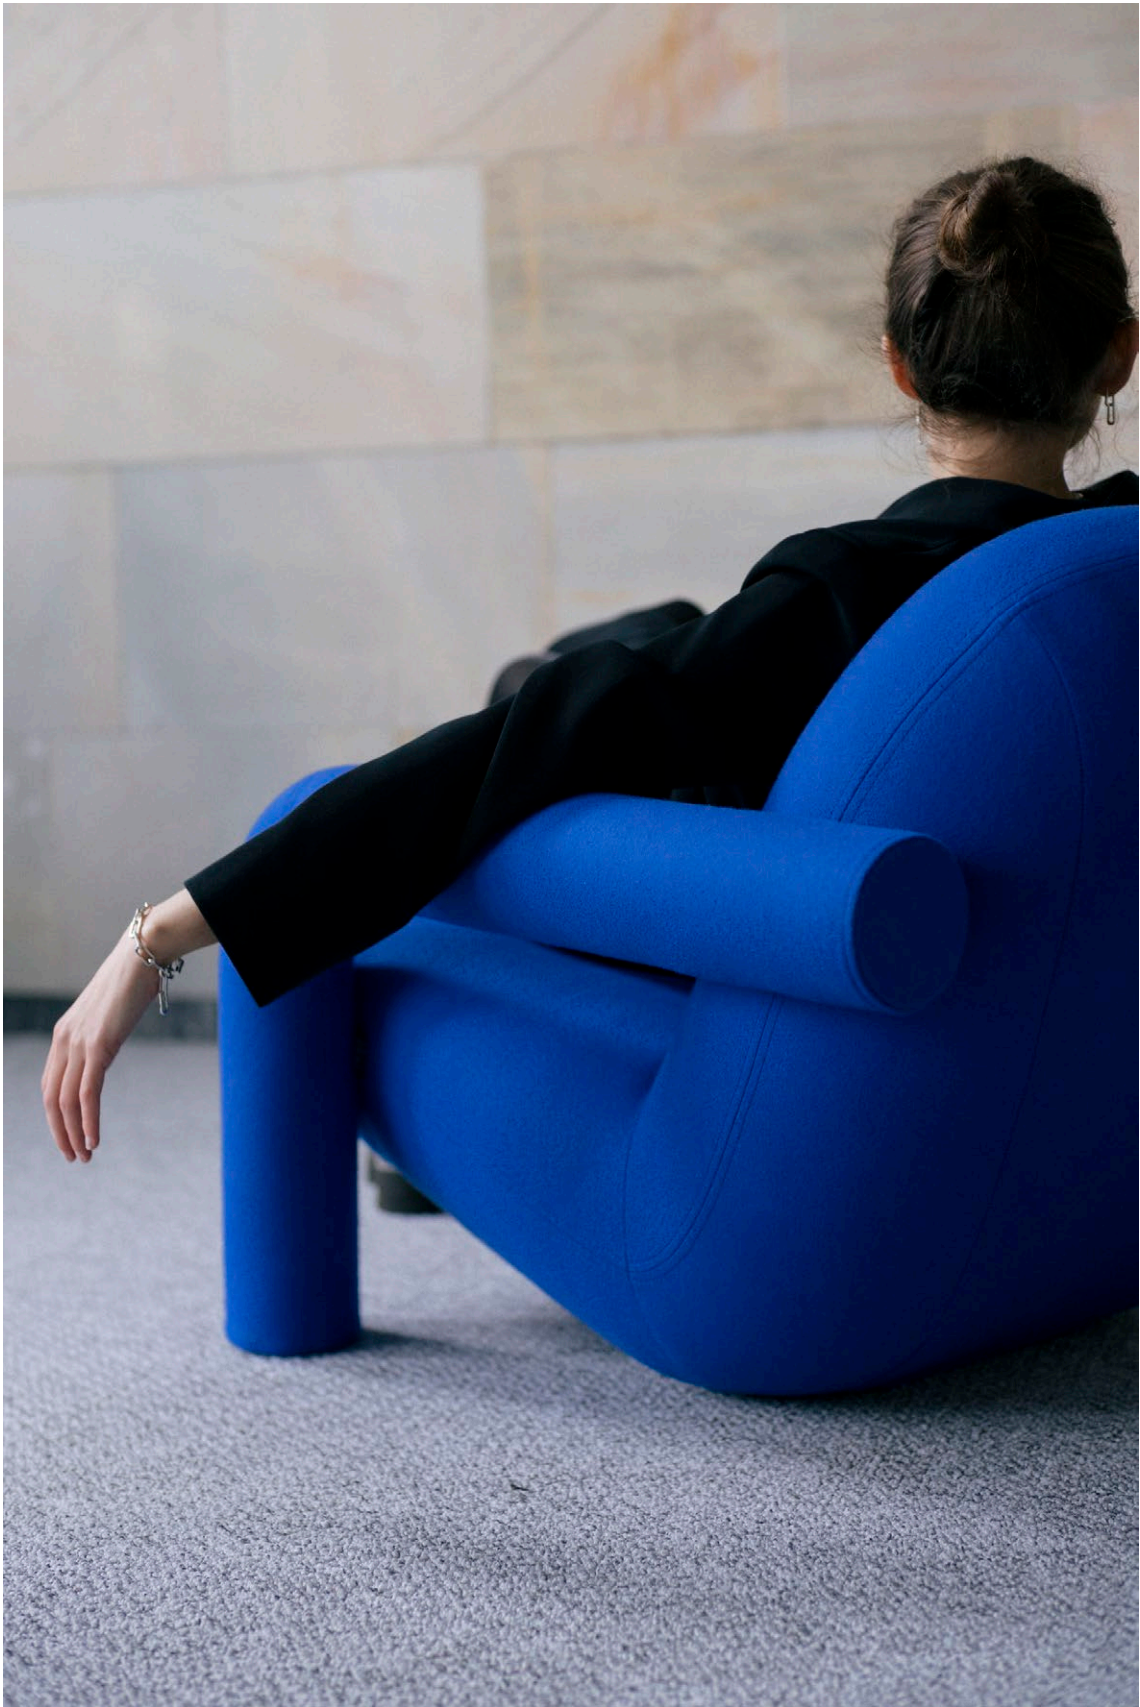

## Ж•Gspot Armchair

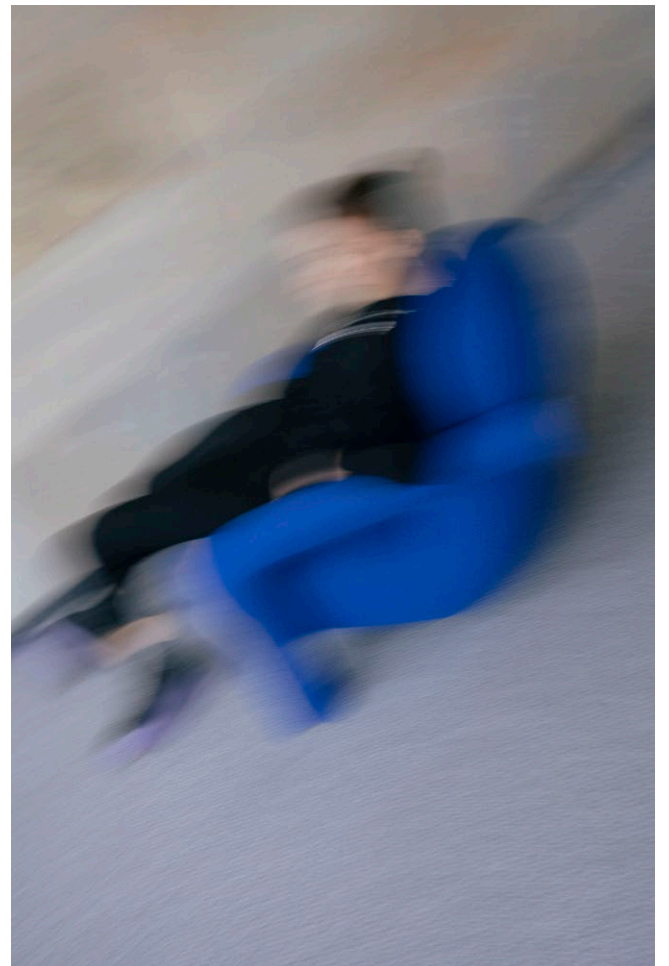

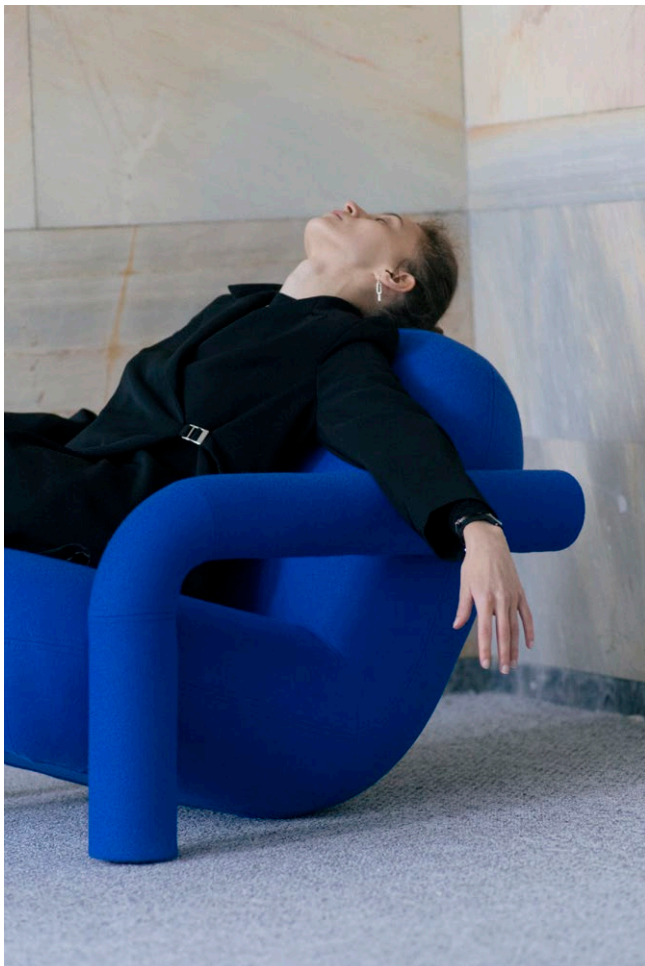

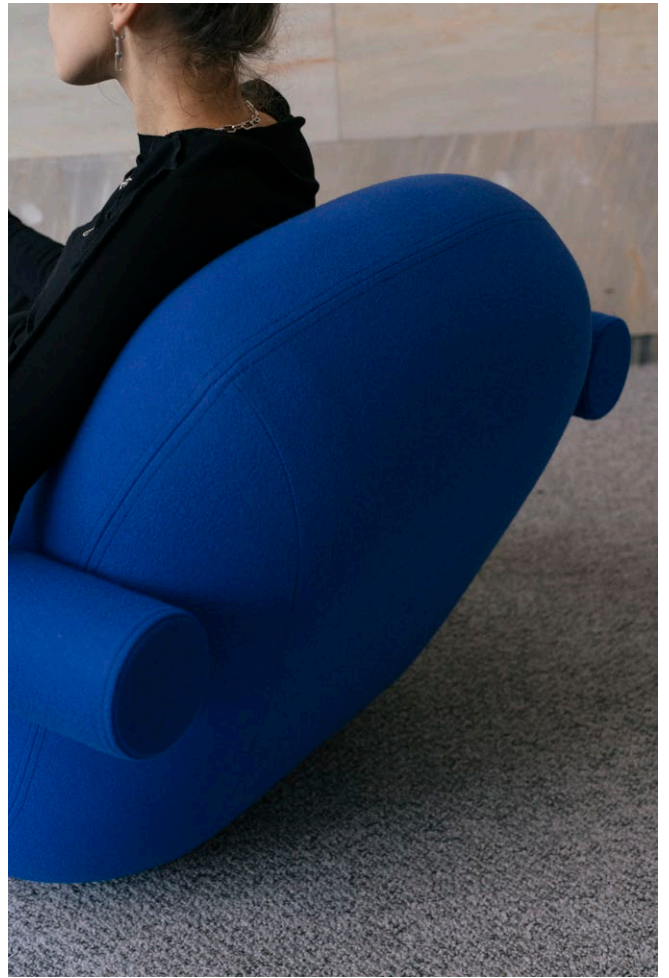

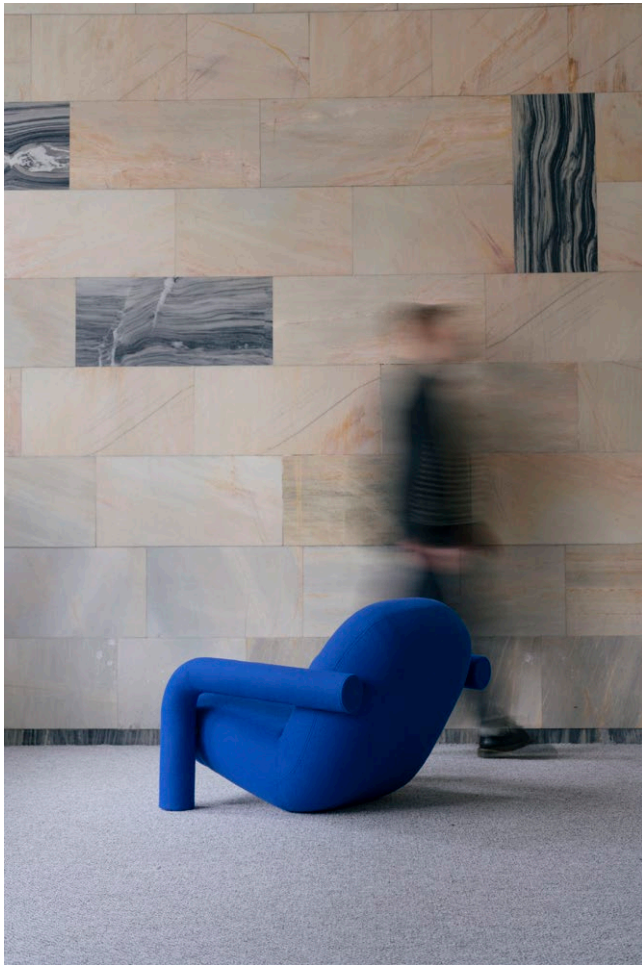

Design Yevhenii Litvinenko

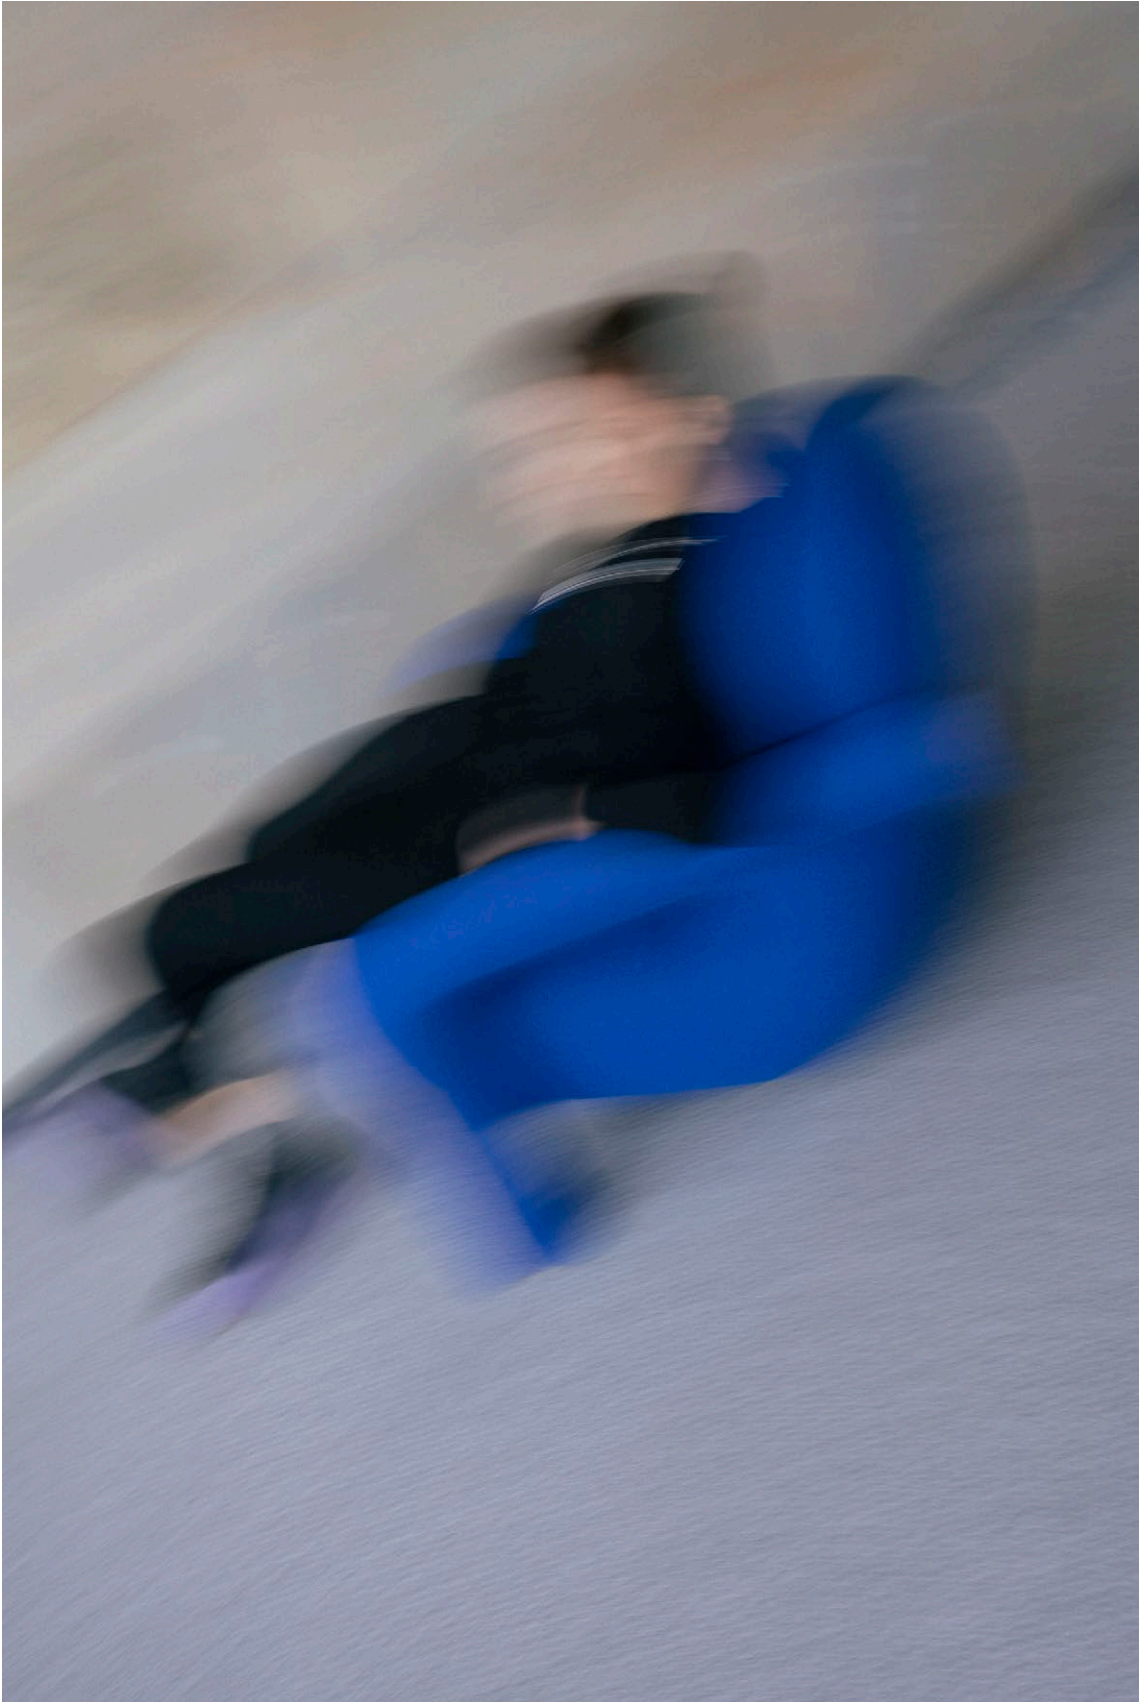

I found him! A bestseller in which you will get really relaxed ! A long search between convenience , functionality and aesthetic! Sorting through different models and looking at the history of chair production in museums, I spent a long time deciding what this particular chair would be like: comfortable, compact and unrealistically cozy . So it would be comfortable for your hands and your knees would not get numb , you would not hit hard parts with your toes, seams would not disturb , armrests would not hurt elbows and the seat would be comfortable... Having sat in thousands of chairs at exhibitions, I can say with confidence that this is what is needed! Just take it and enjoy!
